ABSTRACT

Information in this public document was prepared to assist public school administrators in planning and identifying needs. There are 95 ranked characteristics relating to public education in South Carolina arranged alphabetically by district name, and numerically in order of magnitude of the particular characteristic value. Footnotes supplied after each table as well as an explanatory notes section are supplied to clarify the characteristics of interest. Tables include population, economic, pupil, professional staff, and financial information. (Author/GK)

FOREWORD

For the past ten years, the educational characteristics in this document have been presented in essentially the same style to allow comparisons over time. Each issue has been modified to include available characteristics; therefore, comparisons will vary in the number of years data are available. Such comparisons will yield changes in descriptive trends for districts as well as for the State.

The 1980 edition contains 95 ranked characteristics that are arranged alphabetically, by district name, and numerically, in order of magnitude of the particular characteristic value. In some instances a high value may be favorable; in others it may be unfavorable. Users should give attention to the footnotes and sources that are supplied at the end of each table as well as the Explanatory Notes at the beginning of this document. This information is supplied to further clarify the characteristics of interest.

We urge you to use the presented information with caution. High, low or median values for the characteristics presented in this publication do not necessarily illustrate quality in education. Many other factors must be considered when searching for quality education. Again, you may find the updated information useful in preparing local profiles, public information brochures and other such information sources.

For the past six years the Office of Research, Management Information Section, has provided District Profiles which were based on the numerous characteristics found in this document. These profiles will be available again upon request.

We continue to desire your comments as to how you use the information within this publication and its importance to you. Your recommendations for change as well as any questions concerning the content of this publication are invited and encouraged.

EXPLANATORY NOTES

The 1980 edition of *Rankings* presents 95 tables of characteristics related to public education in South Carolina. The characteristics are arranged alphabetically by school district name and numerically in order of magnitude of the particular characteristic value. In some instances, a high value may be favorable; in others, it may be unfavorable.

Statistics for Felton Laboratory School and South Carolina Youth Services Institutions were excluded from all tables except the one ranking average teacher salaries. The reporting method used in the source document for this table did not allow these exclusions.

The user should review thoroughly the applicable comments below before using the tables presented in this publication.

Population

Tables involving only the 1970 census data were eliminated. All tables in this section involve population estimates as of July 1, 1978.

Economic

Tables relating to employment in various categories (Tables 10-16) display estimates of nonagricultural wage and salary employment by the county in which the work was performed, rather than by the county in which the workers resided. This reporting was consistent with the reporting in previous editions. The State figures may not equal the sum of county figures in the employment tables due to rounding procedures and inability to allocate some workers in the South Carolina totals to specific counties.

In order to maintain the confidential nature of data reported by employers, information was not shown in the source document for industries with fewer than three reporting units or when any firm or two firms combined accounted for 80 percent or more of employment in the industry.

As in the past three editions, the labor force statistics used to calculate unemployment percentages (Table 17) were reported on a residence basis rather than by place of work and were adjusted to the Current Population Survey Benchmark.

Table 18 gives the 1978 average weekly wage of workers covered in employment. The data reported in the source document were based on employment and payroll information reported by employers to the Unemployment Compensation Division of the South Carolina Employment Security Commission on their regular quarterly tax reports.

Pupil

Prior to the 1973-74 school year, the official pupil count was the 10-day cumulative enrollment at the end of the 180-day reporting period. The official pupil count for 1973-74 through 1977-78 was the 35-day cumulative enrollment at the end of the 180-day reporting period. The official pupil count for 1978-79 was the Average Daily Membership (ADM) at the end of the 135-day accounting period. Unless otherwise noted, kindergarten has been included in membership for 1978-79 since it was a part of the official pupil count. For comparison purposes, enrollment figures rather than membership figures were used in Tables 30-35. Comparable ADM figures were not available for the school years depicted in these tables.

Eight new pupil tables (41-48) were added this year. Table 41 reports the percent of pupils eligible for free or reduced-price lunches. Tables 42-47 report weighted memberships in six pupil categories defined by the Education Finance Act of 1977. The weighted memberships allow a comparison among districts of State funds allocated on the basis of pupil counts in the various pupil categories. Table 48 (total weighted membership) is a summation of Tables 42-47.

Tables involving dropouts and retentions were omitted due to the non-availability of the data. Tables involving average daily attendance with the exception of Table 36 have been deleted.

Professional Staff

Unless otherwise stated, statistics for personnel in special education schools were included in tables relating to professional staff. Personnel in the area vocational centers were not included in the various staff tables due to the impracticality of allocating such staff to individual districts. The number of teachers out of certification as reported in Table 62 was smaller than the corresponding figure last year for most districts. The uncertified teacher counts for the 1980 edition were taken from the Annual Report on Accreditation of School Districts. Figures for the 1979 edition were taken from the BEDS profile reports. The table showing teacher turnover rates was not presented in the 1980 edition due to different reporting systems used for the two years in which teacher records would have been matched. Tables containing teacher salary data were moved to the financial section.

Financial

The financial tables included expenditures and revenues for area vocational centers and county boards. The area vocational center monies were prorated among the districts on the basis of the number of pupils attending the centers (See Appendix A). The county board monies were prorated on the basis of ADM of the respective districts (See Appendix B). Total expenditure and revenue amounts in the tables were rounded to dollars, while per pupil amounts were rounded to cents.

The pupil counts used in the computation of expenditures and revenues per pupil were the average daily memberships for the 135-day reporting period. Kindergarten pupils not classified as handicapped or homebound were counted as half-day pupils.

Current operating expenditures reported in this publication included expenditures for adult education, nonpublic schools and public libraries. These expenditures were included also in Community Services, which are a component of Auxiliary Services (Table 90). See Appendix C for a complete listing of accounts used in the computation of revenues and expenditures.

Four tables (63-66) involving teacher salary schedules were added to this edition. Also, the average total annual salary for instructional personnel was presented (Table 67). Average Supplementary Salary was not presented in the 1980 edition due to the new funding procedure established by the Education Finance Act of 1977.

Three tables (75-77) displaying percent change in revenues from 1977-78 to 1978-79 were added this year. Also, Table 84 which ranks districts according to tax effort was a new addition to this publication.

All tables involving changes over a nine-year period in previous editions were revised to reflect changes over a ten-year period.

[a] Preliminary 1978 data from South Carolina, Employment Security Commission, Manpower Research and Analysis, *South Carolina Manpower in Industry*, June 1979.

[b] The labor force data used in deriving these figures were adjusted to the Current Population Survey Benchmark and represent employment and unemployment by place of residence. These data are not comparable to place-of-work data. Workers involved in labor disputes are included among the employed. In addition to nonagricultural wage and salary employment, total employment also includes agricultural workers and nonagricultural self-employed, unpaid family and domestic workers.

[c] State totals may not equal the sum of the county figures due to rounding.

[a] South Carolina, State Department of Education, Office of Finance, Pupil Accounting Section, "135-Day Average Daily Membership Summary, June 1979," and *The South Carolina Education Finance Act of 1977*.

[b] Kindergarten membership is reported for half-day sessions in South Carolina; therefore, the weighting of 1.30 for the classification as presented in the Finance Act was reduced by one-half (to 0.65) in computing the weighted membership.

APPENDIX A

Area Vocational Center Ratios

Below is a listing of the area vocational centers for which revenues or expenditures were prorated among two or more school districts. The number of all pupils attending the center is included as well as the number and percents attributable to the respective districts. The rounded percents shown below will usually give the district amount correct to the nearest dollar when applied to the AVC amount.

County Board Ratios

Below is a listing of multi-district counties along with the corresponding school districts for which county board monies were prorated. The ADM for the county is displayed as well as the ADM and percents attributable to the school districts within the county. Single-district counties are not shown since the tables in this publication include all county board monies in the school district's revenues and expenditures. The rounded percents shown below will usually give the prorated amounts correct to the nearest dollar.
